Afternoon Phil,
That is correct. The final package would include the additional specification items. Rather than slip sheeting we would likely reissue with the inclusion of these additional items.
The attached BID forms have been assembled to best communicate what we require from each of the two dealers to enable the comparison of best price and overall value.

Tom

Subject: bid sheets

Thomas

Is it Perkins & Will's intention to update the bid sheets and or do we manually insert the new specification sheets (once you have them) into the overall specification card package?

- Systems workstation WK.01-C
- the two alternates yet for the closed file
- and closed bookcase at offices

Then the bidders bid on everything including alternates or options, then the options are sorted-out selections made by FERC after final pricing,

Best pricing and value would then be chosen by TALU
